

Extra Soft Pastels

Tints of White

New from Art Spectrum, these extra-soft, extra pale colours are 'the answer to every pastelists dream'. Finishing touches and highlights require a very soft pastel that can apply colour over the top of many layers of previously applied pastel. And highlights aren't always white

- they can be subtle nuances of yellows, pinks, blues, greens, violets and so on. Art Spectrum Extra Soft Tints of White provide artists with exactly that. And of course, being from Art Spectrum, you can be assured that every colour is both lightfast and non-toxic.

Warm Tints

Cool Tints
